

Chicken Soluble Leptin Receptor ELISA Kit | SLR elisa kit

Chicken Soluble Leptin Receptor ELISA Kit

CATALOG #
AAA95929

REACTIVITY
Chicken

PRODUCT SYNONYMS

Soluble Leptin Receptor; Chicken Soluble Leptin Receptor ELISA Kit; SLR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Intended Uses	This SLR ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken SLR. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This SLR ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken SLR. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for SLR elisa kit

Principle of the Assay: SLR ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-SLR antibody and an SLR-HRP conjugate. The assay sample and buffer are incubated together with SLR-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the SLR concentration since SLR from samples and SLR-HRP conjugate compete for the anti-SLR antibody binding site. Since the number of sites is limited, as more sites are occupied by SLR from the sample, fewer sites are left to bind SLR-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SLR concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
