

Rat Prostaglandin F2 ELISA Kit | PGF2 elisa kit

Rat Prostaglandin F2 ELISA Kit

CATALOG #
AAA95993

REACTIVITY
Rat

PRODUCT SYNONYMS

Prostaglandin F2; Rat Prostaglandin F2 ELISA Kit; PGF2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Intended Uses	This PGF2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat PGF2. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PGF2 elisa kit

Principle of the assay: PGF2 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PGF2 antibody and an PGF2-HRP conjugate. The assay sample and buffer are incubated together with PGF2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PGF2 concentration since PGF2 from samples and PGF2-HRP conjugate compete for the anti-PGF2 antibody binding site. Since the number of sites is limited, as more sites are occupied by PGF2 from the sample, fewer sites are left to bind PGF2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PGF2 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
