

## Chicken Cyclophosphamide ELISA Kit | CTX elisa kit

Chicken Cyclophosphamide ELISA Kit

CATALOG #  
**AAA96088**

REACTIVITY  
**Chicken**

### PRODUCT SYNONYMS

Cyclophosphamide; Chicken Cyclophosphamide ELISA Kit; CTX elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                            |
|-------------------------|----------------------------------------------------------------------------|
| Reactivity              | Chicken                                                                    |
| Samples                 | Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate |
| Assay Type              | Competitive                                                                |
| Sensitivity             | 1.0 ng/mL.                                                                 |
| Preparation and Storage | Store all reagents at 2-8 degree C.                                        |

### ADDITIONAL INFORMATION

#### Related Product Information for CTX elisa kit

**Principle of the assay:** CTX ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-CTX antibody and an CTX-HRP conjugate. The assay sample and buffer are incubated together with CTX-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CTX concentration since CTX from samples and CTX-HRP conjugate compete for the anti-CTX antibody binding site. Since the number of sites is limited, as more sites are occupied by CTX from the sample, fewer sites are left to bind CTX-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CTX concentration in each sample is interpolated from this standard curve.

#### Product Categories/Family for CTX elisa kit

Immunology

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
