

Sheep Growth Regulated Oncogene a ELISA Kit | GROa elisa kit

Sheep Growth Regulated Oncogene a ELISA Kit

CATALOG #
AAA96135

REACTIVITY
Sheep

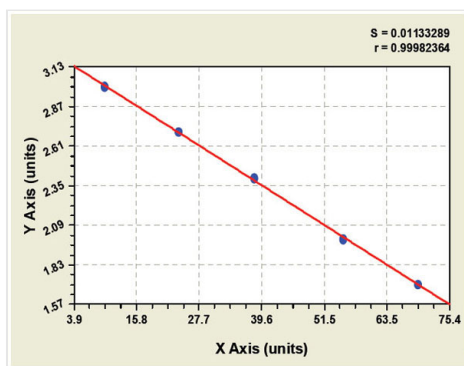

PRODUCT SYNONYMS

Growth Regulated Oncogene a; Sheep Growth Regulated Oncogene a ELISA Kit; GROa elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	100-2500pg/mL
Sensitivity	1.0pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

Related Product Information for GROa elisa kit

Intended Uses: This GROa ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep GROa. This ELISA kit for research use only!

Principle of the Assay: GROa ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-GROa antibody and an GROa-HRP conjugate. The assay sample and buffer are incubated together with GROa-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GROa concentration since GROa from samples and GROa-HRP conjugate compete for the anti-GROa antibody binding site. Since the number of sites is limited, as more sites are occupied by GROa from the sample, fewer sites are left to bind GROa-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GROa concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
