

Chicken Interleukin 1beta Precursor ELISA Kit | Pro-IL-1beta elisa kit

Chicken Interleukin 1beta Precursor ELISA Kit

CATALOG #
AAA96161

REACTIVITY
Chicken

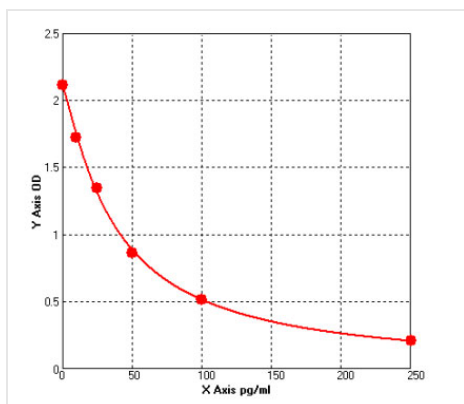

PRODUCT SYNONYMS

Interleukin 1beta Precursor; Chicken Interleukin 1beta Precursor ELISA Kit; Chicken Interleukin 1b Precursor ELISA Kit; Pro-IL-1beta elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of PIL-1beta. No significant cross-reactivity or interference between PIL-1beta and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between PIL-1beta and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Pro-IL-1beta elisa kit	Principle of the Assay: PIL-1beta ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-PIL-1beta antibody and an PIL-1beta-HRP conjugate. The assay sample and buffer are incubated together with PIL-1beta-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PIL-1beta concentration since PIL-1beta from samples and PIL-1beta-HRP conjugate compete for the anti-PIL-1beta antibody binding site. Since the number of sites is limited, as more sites are occupied by PIL-1beta from the sample, fewer sites are left to bind PIL-1beta-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PIL-1beta concentration in each sample is interpolated from this standard curve. Intended Uses: This PIL-1beta ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken PIL-1beta. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	197692689
NCBI GeneID	3553
Molecular Weight	30,748 Da
NCBI Official Full Name	interleukin-1 beta, partial
NCBI Official Synonym Full Names	interleukin 1, beta
NCBI Official Symbol	IL1B
NCBI Official Synonym Symbols	IL-1; IL1F2; IL1-BETA
NCBI Protein Information	interleukin-1 beta; IL-1 beta; catabolin; preinterleukin 1 beta; pro-interleukin-1-beta
UniProt Protein Name	Interleukin-1 beta
UniProt Gene Name	IL1B
UniProt Synonym Gene Names	IL1F2; IL-1 beta
UniProt Entry Name	IL1B_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
