

Porcine Proteinase 3 antineutrophil cytoplasmic antibody ELISA Kit | PR3-ANCA elisa kit

Porcine Proteinase 3 antineutrophil cytoplasmic antibody ELISA Kit

CATALOG #
AAA96261

REACTIVITY
Porcine

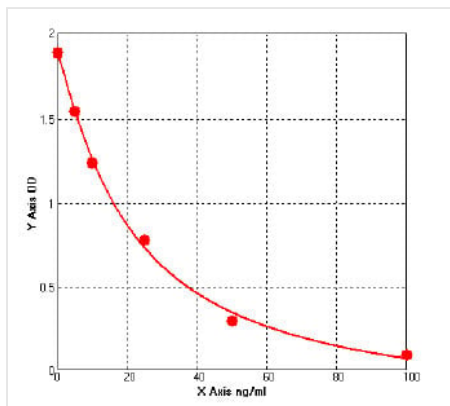

PRODUCT SYNONYMS

Proteinase 3 antineutrophil cytoplasmic antibody; Porcine Proteinase 3 antineutrophil cytoplasmic antibody ELISA Kit; PR3-ANCA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Specificity	This assay has high sensitivity and excellent specificity for detection of PR3-ANCA. No significant cross-reactivity or interference between PR3-ANCA and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between PR3-ANCA and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PR3-ANCA elisa kit	Principle of the Assay: PR3-ANCA ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-PR3-ANCA antibody and an PR3-ANCA-HRP conjugate. The assay sample and buffer are incubated together with PR3-ANCA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PR3-ANCA concentration since PR3-ANCA from samples and PR3-ANCA-HRP conjugate compete for the anti-PR3-ANCA antibody binding site. Since the number of sites is limited, as more sites are occupied by PR3-ANCA from the sample, fewer sites are left to bind PR3-ANCA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PR3-ANCA concentration in each sample is interpolated from this standard curve. Intended Uses: This PR3-ANCA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine PR3-ANCA. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for PR3-ANCA elisa kit	Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
