

Human Osteocrin ELISA Kit | Ostn elisa kit

Human Osteocrin ELISA Kit

CATALOG #
AAA96262

REACTIVITY
Human

PRODUCT SYNONYMS

Osteocrin; Human Osteocrin ELISA Kit; Ostn elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	0.5-10ng/mL
Sensitivity	0.1ng/mL
Intended Uses	This OST ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human OST. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This OST ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human OST. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Ostn elisa kit

Principle of the Assay: OST ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-OST antibody and an OST-HRP conjugate. The assay sample and buffer are incubated together with OST-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the OST concentration since OST from samples and OST-HRP conjugate compete for the anti-OST antibody binding site. Since the number of sites is limited, as more sites are occupied by OST from the sample, fewer sites are left to bind OST-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The OST concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	521020661
UniProt Accession #	P61366; A1A4U3
Molecular Weight	14,722 Da
NCBI Official Full Name	Osteocrin
UniProt Protein Name	Osteocrin
UniProt Gene Name	OSTN
UniProt Entry Name	OSTN_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
