

Bovine Anti-Ganglioside M3 Antibody ELISA Kit | GM3 elisa kit

Bovine Anti-Ganglioside M3 Antibody ELISA Kit

CATALOG #
AAA96316

REACTIVITY
Bovine

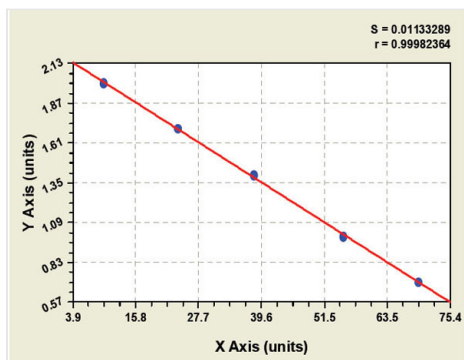

PRODUCT SYNONYMS

Anti-Ganglioside M3 Antibody; Bovine Anti-Ganglioside M3 Antibody ELISA Kit; GM3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Intended Uses	This Anti-GM3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine Anti-GM3. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This Anti-GM3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine Anti-GM3. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GM3 elisa kit

Principle of the Assay: Anti-GM3 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-Anti-GM3 antibody and an Anti-GM3-HRP conjugate. The assay sample and buffer are incubated together with Anti-GM3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Anti-GM3 concentration since Anti-GM3 from samples and Anti-GM3-HRP conjugate compete for the anti-Anti-GM3 antibody binding site. Since the number of sites is limited, as more sites are occupied by Anti-GM3 from the sample, fewer sites are left to bind Anti-GM3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Anti-GM3 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
