

Rabbit 5-Phosphoribosyl 1-Pyrophosphate ELISA Kit | PRPP elisa kit

Rabbit 5-Phosphoribosyl 1-Pyrophosphate ELISA Kit

CATALOG #
AAA96633

REACTIVITY
Rabbit

PRODUCT SYNONYMS

5-Phosphoribosyl 1-Pyrophosphate; Rabbit 5-Phosphoribosyl 1-Pyrophosphate ELISA Kit; PRPP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Principle of the assay: PRPP ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PRPP antibody and an PRPP-HRP conjugate. The assay sample and buffer are incubated together with PRPP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PRPP concentration since PRPP from samples and PRPP-HRP conjugate compete for the anti-PRPP antibody binding site. Since the number of sites is limited, as more sites are occupied by PRPP from the sample, fewer sites are left to bind PRPP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PRPP concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
