

Sheep Casein ELISA Kit | CSN elisa kit

Sheep Casein ELISA Kit

CATALOG #
AAA96637

REACTIVITY
Sheep

PRODUCT SYNONYMS

Casein; Sheep Casein ELISA Kit; CSN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ?g/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Related Product Information for CSN elisa kit

Principle of the assay: CSN1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-CSN1 antibody and an CSN1-HRP conjugate. The assay sample and buffer are incubated together with CSN1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CSN1 concentration since CSN1 from samples and CSN1-HRP conjugate compete for the anti-CSN1 antibody binding site. Since the number of sites is limited, as more sites are occupied by CSN1 from the sample, fewer sites are left to bind CSN1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CSN1 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
