

Goat Relaxin/Insulin Like Family Peptide Receptor 1 ELISA Kit | RXFP1 elisa kit

Goat Relaxin/Insulin Like Family Peptide Receptor 1 ELISA Kit

CATALOG #
AAA96703

REACTIVITY
Goat

PRODUCT SYNONYMS

Relaxin/Insulin Like Family Peptide Receptor 1; Goat Relaxin/Insulin Like Family Peptide Receptor 1 ELISA Kit; RXFP1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This RXFP1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat RXFP1. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for RXFP1 elisa kit

Principle of the assay: RXFP1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-RXFP1 antibody and an RXFP1-HRP conjugate. The assay sample and buffer are incubated together with RXFP1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the RXFP1 concentration since RXFP1 from samples and RXFP1-HRP conjugate compete for the anti-RXFP1 antibody binding site. Since the number of sites is limited, as more sites are occupied by RXFP1 from the sample, fewer sites are left to bind RXFP1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The RXFP1 concentration in each sample is interpolated from this standard curve.
