

Mouse Cytochrome c oxidase ELISA Kit | COX elisa kit

Mouse Cytochrome c oxidase ELISA Kit

CATALOG #
AAA96764

REACTIVITY
Mouse

PRODUCT SYNONYMS

Cytochrome c oxidase; Mouse Cytochrome c oxidase ELISA Kit; COX elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	5.0-100ng/mL
Sensitivity	1.0ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for COX elisa kit

Principle of the assay: COX ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-COX antibody and an COX-HRP conjugate. The assay sample and buffer are incubated together with COX-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the COX concentration since COX from samples and COX-HRP conjugate compete for the anti-COX antibody binding site. Since the number of sites is limited, as more sites are occupied by COX from the sample, fewer sites are left to bind COX-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The COX concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	494322128
NCBI Accession #	WP_007179458.1
NCBI GenBank Nucleotide #	WP_007179458.1
Molecular Weight	56,636 Da
NCBI Official Full Name	cytochrome C oxidase
UniProt Protein Name	Cytochrome c oxidase subunit 2
UniProt Entry Name	I2ID97_9BURK

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
