

Sheep Free cholesterol ELISA Kit | FCHOL elisa kit

Sheep Free cholesterol ELISA Kit

CATALOG #
AAA96768

REACTIVITY
Sheep

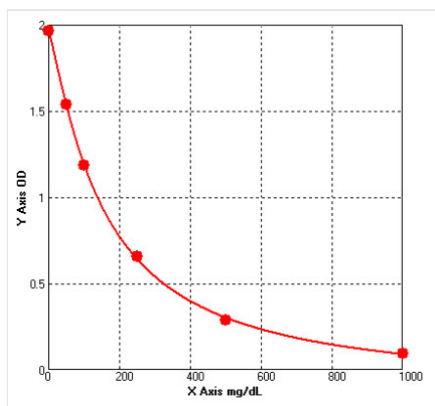

PRODUCT SYNONYMS

Free cholesterol; Sheep Free cholesterol ELISA Kit; FCHOL elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Specificity	This assay has high sensitivity and excellent specificity for detection of FCHOL. No significant cross-reactivity or interference between FCHOL and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between FCHOL and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 mg/dL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for FCHOL elisa kit	Principle of the Assay: FCHOL ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-FCHOL antibody and an FCHOL-HRP conjugate. The assay sample and buffer are incubated together with FCHOL-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the FCHOL concentration since FCHOL from samples and FCHOL-HRP conjugate compete for the anti-FCHOL antibody binding site. Since the number of sites is limited, as more sites are occupied by FCHOL from the sample, fewer sites are left to bind FCHOL-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The FCHOL concentration in each sample is interpolated from this standard curve. Intended Uses: This FCHOL ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep FCHOL. This ELISA kit for research use only, not for therapeutic or test applications!
