

Rabbit Apolipoprotein B48 ELISA Kit | Apo-B48 elisa kit

Rabbit Apolipoprotein B48 ELISA Kit

CATALOG #
AAA96804

REACTIVITY
Rabbit

PRODUCT SYNONYMS

Apolipoprotein B48; Rabbit Apolipoprotein B48 ELISA Kit; Apo-B48 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Specificity	This assay has high sensitivity and excellent specificity for detection of Apo-B48. No significant cross-reactivity or interference between Apo-B48 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between Apo-B48 and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Apo-B48 elisa kit	Intended Uses: This Apo-B48 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit Apo-B48. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: Apo-B48 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-Apo-B48 antibody and an Apo-B48-HRP conjugate. The assay sample and buffer are incubated together with Apo-B48-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Apo-B48 concentration since Apo-B48 from samples and Apo-B48-HRP conjugate compete for the anti-Apo-B48 antibody binding site. Since the number of sites is limited, as more sites are occupied by Apo-B48 from the sample, fewer sites are left to bind Apo-B48-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Apo-B48 concentration in each sample is interpolated from this standard curve.
Product Categories/Family for Apo-B48 elisa kit	Cardiovascular

NCBI AND UNIPROT INFORMATION

NCBI GI #	178802
NCBI GeneID	338
Molecular Weight	515,605 Da
NCBI Official Full Name	apolipoprotein B-48, partial
NCBI Official Synonym Full Names	apolipoprotein B
NCBI Official Symbol	APOB
NCBI Official Synonym Symbols	FLDB; LDLCQ4
NCBI Protein Information	apolipoprotein B-100; apoB-48; apoB-100; apo B-100; mutant Apo B 100; apolipoprotein B48; apolipoprotein B (including Ag(x) antigen)
UniProt Protein Name	Apolipoprotein B-100
UniProt Gene Name	APOB
UniProt Synonym Gene Names	Apo B-100; Apo B-48
UniProt Entry Name	APOB_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
