

Chicken 5-Hydroxyindoleacetic Acid ELISA Kit | 5-HIAA elisa kit

Chicken 5-Hydroxyindoleacetic Acid ELISA Kit

CATALOG #
AAA96879

REACTIVITY
Chicken

PRODUCT SYNONYMS

5-Hydroxyindoleacetic Acid; Chicken 5-Hydroxyindoleacetic Acid ELISA Kit; 5-HIAA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of 5HIAA. No significant cross-reactivity or interference between 5HIAA and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between 5HIAA and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for 5-HIAA elisa kit	Principle of the Assay: 5HIAA ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-5HIAA antibody and an 5HIAA-HRP conjugate. The assay sample and buffer are incubated together with 5HIAA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the 5HIAA concentration since 5HIAA from samples and 5HIAA-HRP conjugate compete for the anti-5HIAA antibody binding site. Since the number of sites is limited, as more sites are occupied by 5HIAA from the sample, fewer sites are left to bind 5HIAA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The 5HIAA concentration in each sample is interpolated from this standard curve. Intended Uses: This 5HIAA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken 5HIAA. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for 5-HIAA elisa kit	Neurobiology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
