

Monkey Growth Hormone Binding Protein ELISA Kit | GHBP elisa kit

Monkey Growth Hormone Binding Protein ELISA Kit

CATALOG #
AAA96909

REACTIVITY
Monkey

PRODUCT SYNONYMS

Growth Hormone Binding Protein; Monkey Growth Hormone Binding Protein ELISA Kit; GHBP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of GHBP. No significant cross-reactivity or interference between GHBP and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between GHBP and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GHBP elisa kit	Intended Uses: This GHBP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey GHBP. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: GHBP ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-GHBP antibody and an GHBP-HRP conjugate. The assay sample and buffer are incubated together with GHBP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GHBP concentration since GHBP from samples and GHBP-HRP conjugate compete for the anti-GHBP antibody binding site. Since the number of sites is limited, as more sites are occupied by GHBP from the sample, fewer sites are left to bind GHBP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GHBP concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	27806879
NCBI GeneID	280802
NCBI Accession #	NP_776341.1
NCBI GenBank Nucleotide #	NM_173916.3
Molecular Weight	20,944 Da
NCBI Official Full Name	glucagon
NCBI Official Synonym Full Names	glucagon<
NCBI Official Symbol	GCG
NCBI Protein Information	glucagon
UniProt Protein Name	Glucagon
UniProt Gene Name	GCG
UniProt Synonym Gene Names	GRPP; OXM; OXY; GLP-1; GLP-1(7-37); GLP-1(7-36); GLP-2
UniProt Entry Name	GLUC_BOVIN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
