

Chicken Estrogens ELISA Kit | ES elisa kit

Chicken Estrogens ELISA Kit

CATALOG #
AAA96952

REACTIVITY
Chicken

PRODUCT SYNONYMS

Estrogens; Chicken Estrogens ELISA Kit; ES elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Related Product Information for ES elisa kit

Intended Uses: This ES ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken ES. This ELISA kit for research use only!

Principle of the Assay||ES ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-ES antibody and an ES-HRP conjugate. The assay sample and buffer are incubated together with ES-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ES concentration since ES from samples and ES-HRP conjugate compete for the anti-ES antibody binding site. Since the number of sites is limited, as more sites are occupied by ES from the sample, fewer sites are left to bind ES-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ES concentration in each sample is interpolated from this standard curve.

Metabolism

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
