

Canine Steroid producing cell autoantibody ELISA Kit | SCA elisa kit

Canine Steroid producing cell autoantibody ELISA Kit

CATALOG #
AAA97194

REACTIVITY
Canine

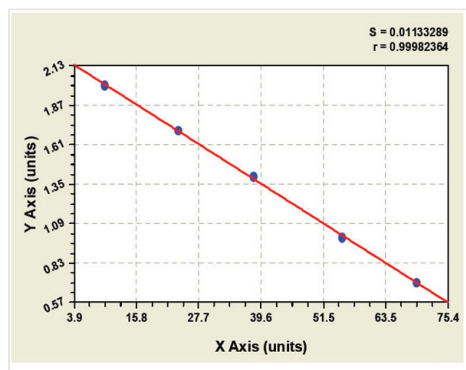

PRODUCT SYNONYMS

Steroid producing cell autoantibody; Canine Steroid producing cell autoantibody ELISA Kit; SCA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	50-1000ng/mL
Sensitivity	1.0ng/mL
Intended Uses	This SCA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine SCA. This ELISA kit for research use only, not for therapeutic applications
!Intended Uses	This SCA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine SCA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for SCA elisa kit	Principle of the Assay: SCA ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-SCA antibody and an SCA-HRP conjugate. The assay sample and buffer are incubated together with SCA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the SCA concentration since SCA from samples and SCA-HRP conjugate compete for the anti-SCA antibody binding site. Since the number of sites is limited, as more sites are occupied by SCA from the sample, fewer sites are left to bind SCA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SCA concentration in each sample is interpolated from this standard curve.
Product Categories/Family for SCA elisa kit	Cell Biology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
