

## Bovine Cyclic Guanosine Monophosphate ELISA Kit | cGMP elisa kit

Bovine Cyclic Guanosine Monophosphate ELISA Kit

CATALOG #  
**AAA97257**

REACTIVITY  
**Bovine**

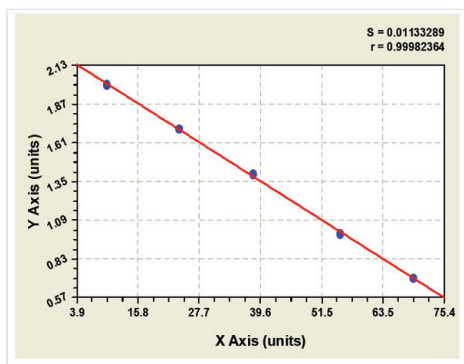

### PRODUCT SYNONYMS

Cyclic Guanosine Monophosphate; Bovine Cyclic Guanosine Monophosphate ELISA Kit; cGMP elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Bovine                                                                                                                                                                                  |
| Samples                 | Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate                                                                                                              |
| Sensitivity             | 1.0 pmol/ml.                                                                                                                                                                            |
| Intended Uses           | This cGMP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine cGMP. This ELISA kit for research use only, not for therapeutic applications! |
| Preparation and Storage | Store all reagents at 2-8 degree C.                                                                                                                                                     |
