

Monkey Myostatin ELISA Kit | Myostatin elisa kit

Monkey Myostatin ELISA Kit

CATALOG #
AAA97286

REACTIVITY
Monkey

PRODUCT SYNONYMS

Myostatin; Monkey Myostatin ELISA Kit; Myostatin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of MSTN. No significant cross-reactivity or interference between MSTN and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between MSTN and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Myostatin elisa kit	Intended Uses: This MSTN ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey MSTN. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: MSTN ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-MSTN antibody and an MSTN-HRP conjugate. The assay sample and buffer are incubated together with MSTN-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the MSTN concentration since MSTN from samples and MSTN-HRP conjugate compete for the anti-MSTN antibody binding site. Since the number of sites is limited, as more sites are occupied by MSTN from the sample, fewer sites are left to bind MSTN-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The MSTN concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	4572644
UniProt Accession #	Q9TSY4
Molecular Weight	14,932 Da
NCBI Official Full Name	myostatin, partial
UniProt Protein Name	Myostatin
UniProt Gene Name	MSTN
UniProt Entry Name	Q9TSY4_PIG

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
