

Sheep Acetyl CoA oxidase ELISA Kit | ACO elisa kit

Sheep Acetyl CoA oxidase ELISA Kit

CATALOG #
AAA97327

REACTIVITY
Sheep

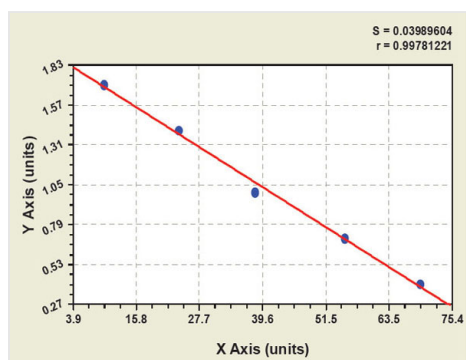

PRODUCT SYNONYMS

Acetyl CoA oxidase; Sheep Acetyl CoA oxidase ELISA Kit; ACO elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ACO elisa kit

Principle of the assay: ACO ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-ACO antibody and an ACO-HRP conjugate. The assay sample and buffer are incubated together with ACO-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ACO concentration since ACO from samples and ACO-HRP conjugate compete for the anti-ACO antibody binding site. Since the number of sites is limited, as more sites are occupied by ACO from the sample, fewer sites are left to bind ACO-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ACO concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
