

Goat Lipoxin A4 ELISA Kit | LXA4 elisa kit

Goat Lipoxin A4 ELISA Kit

CATALOG #
AAA97359

REACTIVITY
Goat

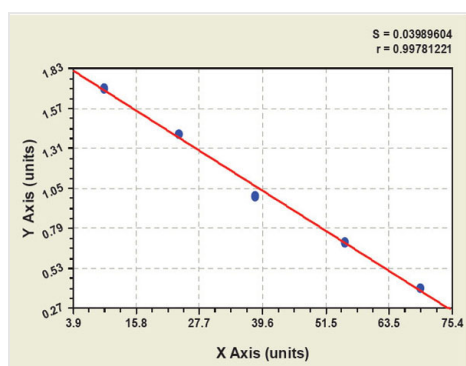

PRODUCT SYNONYMS

Lipoxin A4; Goat Lipoxin A4 ELISA Kit; LXA4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Goat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This LXA4 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Goat LXA4. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for LXA4 elisa kit

Principle of the assay: LXA4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-LXA4 antibody and an LXA4-HRP conjugate. The assay sample and buffer are incubated together with LXA4-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LXA4 concentration since LXA4 from samples and LXA4-HRP conjugate compete for the anti-LXA4 antibody binding site. Since the number of sites is limited, as more sites are occupied by LXA4 from the sample, fewer sites are left to bind LXA4-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LXA4 concentration in each sample is interpolated from this standard curve.

Product Categories/Family for LXA4 elisa kit

Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
