

Monkey Anti-IgE receptor antibody ELISA Kit | IgER elisa kit

Monkey Anti-IgE receptor antibody ELISA Kit

CATALOG #
AAA97386

REACTIVITY
Monkey

PRODUCT SYNONYMS

Anti-IgE receptor antibody; Monkey Anti-IgE receptor antibody ELISA Kit; IgER elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	250-5000pg/mL
Sensitivity	1.0pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

Principle of the assay: Anti-IgER ELISA kit applies the competitive enzyme immunoassay technique utilizing a IgER antigen and an anti-IgER-HRP conjugate. The assay sample and buffer are incubated together with anti-IgER-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the anti-IgER concentration since anti-IgER from samples and anti-IgER-HRP conjugate compete for the IgER antigen binding site. Since the number of sites is limited, as more sites are occupied by anti-IgER from the sample, fewer sites are left to bind anti-IgER-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The anti-IgER concentration in each sample is interpolated from this standard curve.

Immunology

NCBI AND UNIPROT INFORMATION

NCBI GI #	556391
NCBI Official Full Name	IgE receptor, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
