

Porcine Corticosteroid Binding Globulin (CBG) ELISA Kit | SERPINA6 elisa kit

Porcine Corticosteroid Binding Globulin (CBG) ELISA Kit

CATALOG #
AAA97620

REACTIVITY
Porcine

PRODUCT SYNONYMS

Corticosteroid Binding Globulin (CBG); Porcine Corticosteroid Binding Globulin (CBG) ELISA Kit; SERPINA6 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Specificity	This assay has high sensitivity and excellent specificity for detection of CBG. No significant cross-reactivity or interference between CBG and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CBG and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Intended Uses	This BG CBG ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine CBG. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for SERPINA6 elisa kit	Principle of the Assay: CBG ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-CBG antibody and an CBG-HRP conjugate. The assay sample and buffer are incubated together with CBG-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CBG concentration since CBG from samples and CBG-HRP conjugate compete for the anti-CBG antibody binding site. Since the number of sites is limited, as more sites are occupied by CBG from the sample, fewer sites are left to bind CBG-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CBG concentration in each sample is interpolated from this standard curve. Intended Uses: This CBG ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine CBG. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	73858564
NCBI GeneID	866
NCBI Accession #	NP_001747.2
NCBI GenBank Nucleotide #	NM_001756.3
Molecular Weight	45,141 Da
NCBI Official Full Name	corticosteroid-binding globulin
NCBI Official Synonym Full Names	serpin peptidase inhibitor, clade A (alpha-1 antiproteinase, antitrypsin), member 6
NCBI Official Symbol	SERPINA6
NCBI Official Synonym Symbols	CBG
NCBI Protein Information	corticosteroid-binding globulin; serpin A6; transcortin; corticosteroid binding globulin; serine (or cysteine) proteinase inhibitor, clade A (alpha-1 antiproteinase, antitrypsin), member 6
UniProt Protein Name	Corticosteroid-binding globulin
UniProt Gene Name	SERPINA6
UniProt Synonym Gene Names	CBG; CBG
UniProt Entry Name	CBG_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
