

## Human Putative pro-MCH-like protein 1 ELISA Kit | PMCHL1 elisa kit

Human Putative pro-MCH-like protein 1 ELISA Kit

CATALOG #  
**AAA98244**

REACTIVITY  
**Human**

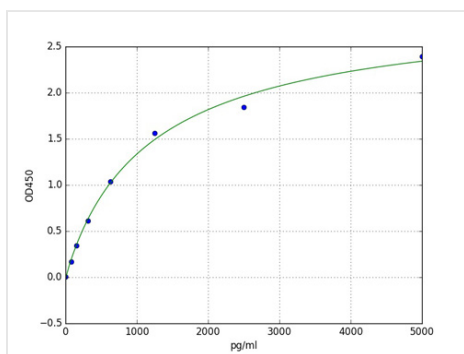

### PRODUCT SYNONYMS

Putative pro-MCH-like protein 1; Human Putative pro-MCH-like protein 1 ELISA Kit; PMCHL1 (Putative pro-MCH-like protein 1)/Pro-MCH variant/Pro-melanin-concentrating hormone-like protein 1; PMCHL1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                              |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                        |
| Sequence Length         | 86                                                                                                                                                           |
| Assay Type              | Sandwich ELISA, Double Antibody                                                                                                                              |
| Samples                 | Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples                                                                         |
| Detection Range         | 78.125-5000pg/ml                                                                                                                                             |
| Sensitivity             | 46.875pg/ml                                                                                                                                                  |
| Preparation and Storage | Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C |

### ADDITIONAL INFORMATION

#### Related Product Information for PMCHL1 elisa kit

**Principle of the Assay**||This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Anti-Human PMCHL1 antibody was pre-coated onto 96-well plates. And the biotin conjugated anti-Human PMCHL1 antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and wash with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Human PMCHL1 amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of Human PMCHL1 can be calculated.

NCBI AND UNIPROT INFORMATION

|                         |                                 |
