

## Rat Protein Kinase C Delta ELISA Kit | PKCD elisa kit

Rat Protein Kinase C Delta ELISA Kit

|                              |                          |
|------------------------------|--------------------------|
| CATALOG #<br><b>AAA98311</b> | REACTIVITY<br><b>Rat</b> |
|------------------------------|--------------------------|

### PRODUCT SYNONYMS

Protein Kinase C Delta; Rat Protein Kinase C Delta ELISA Kit; PKCD/PRKCD/MAY1/MGC49908/nPKC-delta/PKCD/protein kinase C delta type/protein kinase C delta VIII/protein kinase C; delta; PKCD elisa kit

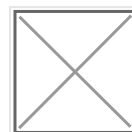

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                              |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                                                                          |
| Sequence Length         | 365                                                                                                                                                          |
| Assay Type              | Sandwich ELISA, Double Antibody                                                                                                                              |
| Samples                 | Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples                                                                         |
| Detection Range         | 1.563-100ng/ml                                                                                                                                               |
| Sensitivity             | 0.938ng/ml                                                                                                                                                   |
| Preparation and Storage | Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C |

| Related Product Information for PKCD elisa kit | Principle of the Assay  This kit was based on sandwich enzyme-linked immune-sorbent assay technology. anti-Rat PKCD antibody was pre-coated onto 96-well plates. And the biotin conjugated anti-Rat PKCD antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and wash with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Rat PKCD amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of Rat PKCD can be calculated. |
