

## Human Orexin receptor type 1 ELISA Kit | HCRT1R1 elisa kit

Human Orexin receptor type 1 ELISA Kit

CATALOG #  
**AAA99580**

REACTIVITY  
**Human**

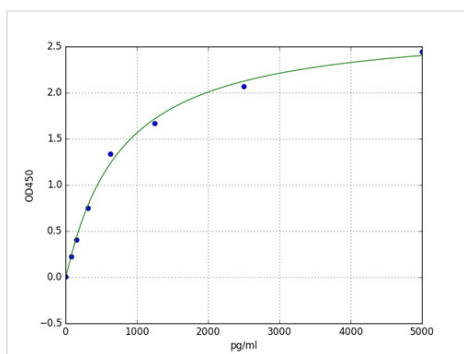

### PRODUCT SYNONYMS

Orexin receptor type 1; Human Orexin receptor type 1 ELISA Kit; HCRT1R1/OX1R (Orexin receptor type 1)/ox-1-R/Ox1-R/hypocretin (orexin) receptor 1/hypocretin receptor 1/Hypocretin receptor type 1/hypocretin receptor-1/orexin receptor 1/orexin receptor-1/; HCRT1R1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                              |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                        |
| Sequence Length         | 425                                                                                                                                                          |
| Assay Type              | Sandwich ELISA, Double Antibody                                                                                                                              |
| Samples                 | Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples                                                                         |
| Detection Range         | 78.125-5000pg/ml                                                                                                                                             |
| Sensitivity             | 46.875pg/ml                                                                                                                                                  |
| Preparation and Storage | Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C |

#### Typical Data & Standard Curve

Results of a typical standard run of a Human HCRT1R1 ELISA Kit are shown below. This standard curve was generated at our lab for demonstration purpose only. Each user should obtain their own standard curve as per experiment. (N/A-not applicable)

| X | pg/ml | 0     | 78    | 156   | 312.5 | 625   | 1250  | 2500  | 5000  |
|---|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Y | OD450 | 0.031 | 0.407 | 0.702 | 0.989 | 1.454 | 1.917 | 2.258 | 2.352 |

### ADDITIONAL INFORMATION

#### Related Product Information for HCRT1R1 elisa kit

Principle of the Assay||This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Anti-Human HCRT1R1 antibody was pre-coated onto 96-well plates. And the biotin conjugated anti-Human HCRT1R1 antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and wash with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Human HCRT1R1 amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of Human HCRT1R1 can be calculated.
