

## Mouse Apoptotic Peptidase Activating Factor 1 ELISA Kit | APAF1 elisa kit

Mouse Apoptotic Peptidase Activating Factor 1 ELISA Kit

CATALOG #  
**AAA99683**

REACTIVITY  
**Mouse**

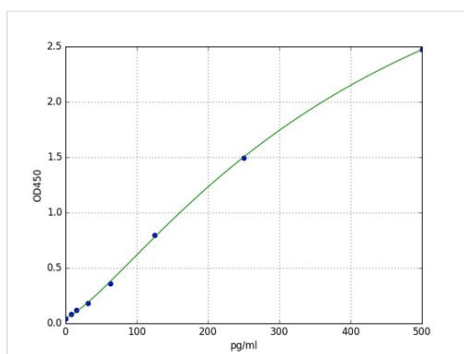

### PRODUCT SYNONYMS

Apoptotic Peptidase Activating Factor 1; Mouse Apoptotic Peptidase Activating Factor 1 ELISA Kit; APAF1/Apoptotic protease-activating factor 1 (APAF-1)/APAF-1apoptotic protease activating factor 1/apoptotic peptidase activating factor/apoptotic peptidase activating factor 1/apoptotic protease activating factor/apoptotic protease-activating factor 1/CED4; APAF1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                              |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                        |
| Sequence Length         | 1248                                                                                                                                                         |
| Assay Type              | Sandwich ELISA, Double Antibody                                                                                                                              |
| Samples                 | Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples                                                                         |
| Detection Range         | 7.813-500pg/ml                                                                                                                                               |
| Sensitivity             | 4.688pg/ml                                                                                                                                                   |
| Preparation and Storage | Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C |

Standard Curve (Sample)

#### Typical Data & Standard Curve

Results of a typical standard run of a Mouse APAF1 ELISA Kit are shown below. This standard curve was generated at our lab for demonstration purpose only. Each user should obtain their own standard curve as per experiment. (N/A=not applicable)

| X | pg/ml | 0     | 7.8   | 15.6  | 31.2  | 62.5  | 125   | 250   | 500   |
|---|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Y | OD450 | 0.048 | 0.104 | 0.164 | 0.276 | 0.533 | 0.954 | 1.858 | 2.750 |

### ADDITIONAL INFORMATION

#### Related Product Information for APAF1 elisa kit

**Principle of the Assay**||This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Anti-Mouse APAF1 antibody was pre-coated onto 96-well plates. And the biotin conjugated anti-Mouse APAF1 antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and wash with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Mouse APAF1 amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of Mouse APAF1 can be calculated.
