

Human Phenylalanine Hydroxylase ELISA Kit | PAH elisa kit

Human Phenylalanine Hydroxylase ELISA Kit

CATALOG #
AAA99775

REACTIVITY
Human

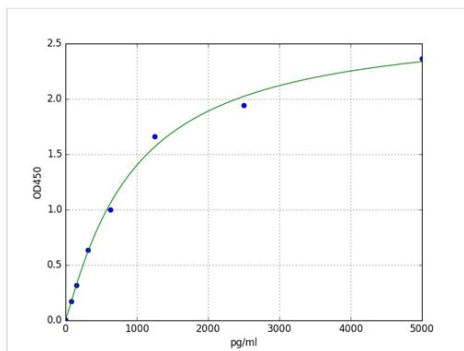

PRODUCT SYNONYMS

Phenylalanine Hydroxylase; Human Phenylalanine Hydroxylase ELISA Kit; PAH; PAH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	3
Assay Type	Sandwich ELISA, Double Antibody
Samples	Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples
Detection Range	78.125-5000pg/ml
Sensitivity	46.875pg/ml
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

Standard Curve (Sample)

Typical Data & Standard Curve

Results of a typical standard run of a Human PAH ELISA Kit are shown below. This standard curve was generated at our lab for demonstration purpose only. Each user should obtain their own standard curve as per experiment. (N/A=not applicable)

X	pg/ml	0	78	156	312.5	625	1250	2500	5000
Y	OD450	0.041	0.392	0.715	1.078	1.414	2.018	2.581	2.365

ADDITIONAL INFORMATION

Related Product Information for PAH elisa kit

Principle of the Assay||This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Anti-Human PAH antibody was pre-coated onto 96-well plates. And the biotin conjugated anti-Human PAH antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and wash with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the Human PAH amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of Human PAH can be calculated.
